CAREER SUMMARY

Results-driven Full Stack Developer specializing in workflow automation, API integrations, and Generative AI developer tools. Hands-on experience in building event-driven automation pipelines using **n8n** and optimizing backend systems. Proven ability to reduce manual operational overhead and implement real-time data sync solutions across multiple software internships.

TECHNICAL SKILLS

- **Automation & AI:** n8n Workflow Automation, Webhooks, Event-Driven Triggers, Conditional Routing, Prompt Engineering, OpenAI/Gemini API Integration.
- **Core Programming & Backend:** Python, Node.js, Express.js, RESTful APIs, WebSockets, JSON Data Handling.
- **Databases & Tools:** Supabase, MongoDB, MySQL, Postman (API Testing), Git & GitHub.
- **SaaS & Cloud Integrations:** Shopify Ecosystem, Slack API, Google Workspace (Forms, Sheets), HubSpot API basics.
- **Soft Skills:** Problem-Solving & Logic Design, Technical Curiosity, Remote Independence, Cross-Functional Communication.

INTERNSHIP EXPERIENCE

FULL STACK DEVELOPER INTERN | LABMENTIX | REMOTE SEP 2025 - MAR 2026

- Integrated **4 third-party** and Generative AI APIs to automate repetitive internal operational workflows, **saving 10+ hours** of manual processing per week.
- Developed **full-stack web architectures** using Node.js and MongoDB, improving **API ingestion** speeds and data handling efficiency.
- Implemented secure **RESTful** endpoints ensuring seamless data communication with zero latency bottlenecks.

PROJECTS

AI-Driven eCommerce Support Automation Agent

Tech Stack: n8n, Gemini API, Webhooks, Google Sheets API, Slack API, JSON Data Handling

- Designed and deployed an **end-to-end automated** customer support pipeline using **n8n** to process incoming customer inquiries via **webhooks**.
- Integrated **Google Gemini API** to analyze ticket sentiment, categorize urgency, and dynamically generate **context-aware** email response drafts.
- Configured **conditional routing logic** within n8n to automatically log high-priority issues into a cloud database and trigger instant alerts on **Slack** for human operators.

n8n Event-Driven Lead Automation Pipeline

Tech Stack: n8n, Webhooks, Google Forms API, SMTP Server, JSON Parsing

- Built an **automated pipeline** that triggers immediate, personalized email responses upon Google Form submissions.
- Configured **automated JSON** data extracting layers within **n8n** to process form fields and map them into email templates.

CureAsap – Real-Time Emergency Rescue System.

Tech Stack: WebSockets, Node.js, React.js, Express.js, MongoDB, Geolocation API

- **Collaborated in a 2-member team** to architect and deploy an end-to-end real-time emergency dashboard for hospitals to accept location-based rescue requests.
- Co-developed **automated backend sub-systems** for instant bed inventory updates, driver assignment pipelines, and **automated emergency record generation**.

EDUCATION

Bachelor's of Computer Application | Expected Graduation: 2026

Dr. Bhimrao Ambedkar University – Agra, UP

CERTIFICATES AND ACHIEVEMENTS

- **Mastering Generative AI and ChatGPT** | *GeeksforGeeks (2025)*
- **Web Development Bootcamp** | *Hitesh Choudhary via Udemy (2025)*
- **Python Development** | *Udemy (2025)*
- **Gold Medalist, University Debate Competition on AI** | *University Computer Centre (2024)*
- **Letters of Recommendation for Exceptional Performance** | *Labmentix*
